ISOHEAT®

Qualität
Made in Germany

High Tech Engineering

From the planning
through to the final operational product

ISOHEAT®

www.isoheat.de

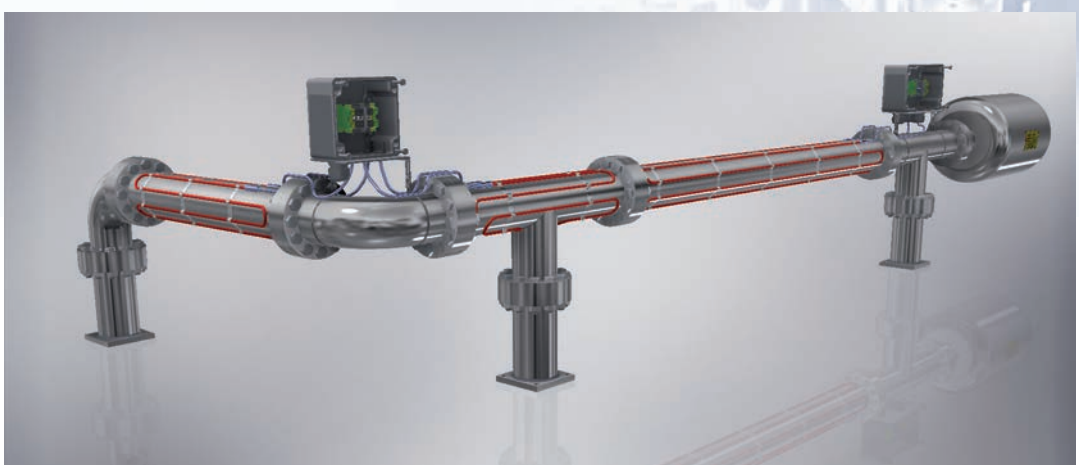

The brand name for individual electrical heating technology

The brand name

ISOHEAT® is the brand name for the highest quality standards in industrial heating technology.

On the one hand, ISOHEAT® stands for high quality standard products in the following product ranges:

- Heating bands and heating lines up to 900°C
- Mineral-insulated heating lines up to 1,000°C
- Flexible heating sleeves for applications up to 900°C
- Insulting sleeves with various thicknesses of insulation
- Barrel and container heating for explosion endangered areas
- Pipe trace heating with mineral-insulated heating lines in explosion endangered areas
- Controllers and regulating devices

On the other hand, ISOHEAT® stands for individual and customer-specific heating systems from the planning through to the finished end product e.g. in the following areas:

- Frost-protection heating
- Bunker peak heating
- Filter heating
- Feed auger heating
- Pump heating
- Heating chambers
- Radiating heaters for coating equipment

The heating systems can be designed for temperatures up to 1,000°C. The performance features are individually designed and calculated to match the respective requirements of each individual customer.

High Tech Engineering

With over 2,500 m2 of production area and the latest software technology for planning as well as the most up-to-date CNC systems and laser welding equipment for production, we are now also in a position to fulfil very challenging customer wishes.

Our core skills:

We plan and produce heating systems for industry and research.

Fields in which we are active with our products as a certified partner include:

- Oil and gas industry
- Nuclear technology
- Pharmaceuticals industry
- Chemical industry
- Petrochemical industry
- Foodstuffs industry
- Particle accelerators
- Surface coatings in high vacuums
- Power station construction
- Solar technology
- Machinery construction

ISOHEAT® is an ATEX and IECEx certified company and fulfils the enhanced safety standards in accordance with the current explosion protection guidelines
